

CASE STUDY

Heavy-Duty Waterproofing Girona / Spain Airport Car Park

The Airport multi-storey Car Parking area in the city of Girona in Spain was one of the most challenging waterproofing projects in Spain.

This 20.000 m2 heavy duty roof car parking deck was appointed to be waterproofed with the **MARISEAL SYSTEM®**.

The **MARISEAL SYSTEM®** is the technologically advanced, premium liquid polyurethane waterproofing system that offers easy application, full certifications, and most importantly guaranteed long lasting results. It can be used for any roof or terrace in new construction but also for repair or renewal.

The **MARISEAL SYSTEM®** consists of different products, dependent on the decks characteristics. In this case the system applied consisted of the polyurethane **MARISEAL AQUA PRIMER**, the certified one component polyurethane liquid waterproofing membrane **MARISEAL 250** applied in combination with the **MARISEAL FABRIC** reinforcing geotextile and the heavy-duty aliphatic polyurethane top-coat **MARISEAL 420**.

MARISEAL SYSTEM®

Advantages of the **MARISEAL SYSTEM®** waterproofing:

- Provides Waterproofing & Decoration
- Permanent elastic
- UV stable - Color stable
- Vehicular and pedestrian traffic resistant
- Anti-slip and impact resistant
- Minimal additional weight and height added to substrate
- Remains flexible over a temperature span of -40°C to +90°C
- Provides excellent adhesion to almost any type of surface
- Resistant to detergents, oils, fuels and seawater
