

CASE STUDY

Car Parking Floor Coating of Super Market

This underground, internal Car Parking area of a large Super Market in Istanbul Turkey needed a professional and durable protective coating for the vehicular park-deck floor.

The **MARIPUR SYSTEM®** was selected to do the demanding job of the protection. The **MARIPUR SYSTEM®** is a technologically advanced, premium polyurethane thin-layer floor coating system that offers easy application, high mechanical strength and high durability. It can be used for new floor construction but also for repair or renewal.

The **MARIPUR SYSTEM®** consists of different products, dependent on the floors characteristics. In this case the system consisted of a one component polyurethane primer the MARIPUR 7000, and the one component polyurethane coating MARIPUR 7100 for internal use.

Advantages of the **MARIPUR SYSTEM®**

- Easy application (one component)
- Quick curing and service times
- High abrasion resistant
- Does not allow tire-marks
- Does not absorb liquid stains
- Stops the creation of dust
- Provides a seamless coating discouraging bacterial growth
- Hard-elastic
- Resistant to water, heat and frost
- Water vapor permeable
- Decorative
- Low Cost
